# Growing Green Futures: Contribute to HAF’s Impact in Sustainable Development

 3d ago | Source: High Atlas Foundation

**We at the High Atlas Foundation are excited to share the remarkable progress of our environmental and community development work across Morocco.**

Our Growing Impact

HAF continues to lead sustainable reforestation efforts that strengthen both our environmental and our communities:

- 2.4 million trees planted since 2024
- 2.1 million tons of CO2 abated between 2021 and 2024
- Verified, transparent environmental impact that meets international standards

More Than Trees

Our tree-planting initiatives create lasting benefits. Each project generates:

- Improved agricultural yields and food security for farming families
- Economic opportunities through women’s cooperatives
- Interfaith collaboration that strengthens community bonds
- Sustainable livelihoods for future generations

The community nurseries HAF supports cultivate endemic tree varieties including pomegranate, carob, walnut, pistachio, olive, argan, fig, and cherry – species that are both ecologically valuable and economically beneficial for local communities.

## Partnership Opportunities

We welcome organizations and individuals who share our vision of environmental restoration paired with human development. Whether through:

- Supporting specific restoration, tree-planting, water infrastructure, empowerment, or other initiatives
- Sponsoring community led-projects
- Long-term strategic collaboration

HAF offers flexible models that align environmental impact with social transformation.

## Join Us

Together, we can achieve measurable climate action while investing in sustainable community development. We'd be delighted to discuss how we can work together to create positive change.

For more information about partnership opportunities, project site visits, or detailed impact stories, please reach out to our team or visit our website.
