On the Issues with Alon Ben-Meir

Dear Friends,

Welcome back for a new episode of my podcast "On the Issues." Thank you for your continued support, and I continue to welcome your thoughts and views.

New episodes are now being broadcast live every week on Tuesdays. Stay tuned to your email for information about upcoming recordings. Archived episodes will be released the following day, on Wednesdays at noon. Subscribe on your favorite podcast app, including [Soundcloud](#), [Apple Podcasts](#), and [Spotify](#), to be sure to always get the latest episodes.

Today's guest is Yossef Ben-Meir, co-founder and president of the High Atlas Foundation, a Moroccan-US nongovernment organization dedicated to sustainable development.

In this episode, we discuss sustainable development in Morocco and the role the High Atlas Foundation has played in development. Particularly, we discuss the importance of water infrastructure in uplifting everyday Moroccans, the environmental and societal implications of planting millions of trees across Morocco, and the critical importance of community participation in establishing development projects which will benefit local communities.
